

Adult Services

Adult Training Facility (ATF)

An ATF offers adults with developmental disabilities assistance and education in the areas of daily living skills, pre-vocational activities and community involvement, and provides for recreational and social opportunities.

Case Management Services

Administrative Case Managers present individuals with free information, referral and monitoring services. Blended Case Managers work with adults who are having emotional or behavioral problems to find local services like counseling, medical services, recreation programs, tutoring, housing, and more. Supports Coordinators assist adults with developmental disabilities and their families in locating, coordinating and monitoring services received through the developmental disabilities system or in the community.

Community Home (CH)

Community Home provides residential support for adults with developmental disabilities. Individuals reside in residences within their community and assistance is provided as needed 24-hours a day, 7 days a week.

Community Residential Rehabilitation Services (CRR)

CRR is a homelike, non-institutional living arrangement that provides the opportunity to learn skills necessary for independent living for adult mental health consumers.

Consumer Supports/Services

Consumer Driven supports, such as Drop-In Centers, offer opportunities for socialization, peer support and client advocacy. The Consumer/Family Satisfaction Team assures that consumers of mental health services and families of consumers are receiving quality service. Also available in the county are Compeer supports and representative payee services.

Community Treatment Teams (CTT)

CTT is an all-inclusive, intensive service available to adults in the community. The service is delivered by a team and includes mental health services, support services and case management.

Crisis Intervention

Counselors are available in the office or over the phone to speak with adults who are feeling depressed, overwhelmed or frightened. The 24-hour crisis phone number is (724) 437-1003

Family Driven Services (FDS)

FDS offers adults with developmental disabilities and their families the opportunity to purchase items and services that enhance their ability to remain in their homes. Services include, but are not limited to: sitter/aide, respite, homemaker, recreational/social activities, and adaptive equipment.

Family Living Program (FLP) / Life Sharing

Life Sharing gives adults with developmental disabilities the opportunity to reside in "host" family homes and participate as a member of the family while receiving assistance with their daily living needs.

Forensic Services

Counseling and psychiatric treatment is provided to incarcerated individuals when needed. Case Management is also provided to adult mental health consumers who are incarcerated so they can access services and treatment prior to their release back to the community. A continuum of services is available to address the mental health needs of individuals with serious mental illness in the criminal justice system, including outpatient services at the County Prison; a Forensic Diversion and Re-Entry Team that helps individuals with a serious mental illness and criminal justice history successfully re-integrate into the community following incarceration; and a specialty Treatment Court to assure that eligible non-violent offenders with a serious mental illness are sentenced to treatment and monitoring by the Court rather than jail.

Home-Based Services

Individuals with developmental disabilities and their families can receive in-home assistance to address the needs of their special needs family member. Services can include sitter/aide services, respite and home adaptations.

Inpatient Hospitalization

There are several psychiatric inpatient hospitals in or near Fayette County that provide 24-hour psychiatric care for adults.

Long Term Structured Residential Program (LTSR)

The LTSR is a 24-hour, highly structured, therapeutic residential facility, designed to serve persons eighteen years or older who are eligible for psychiatric hospitalization, but who are able to receive intensive treatment in a community setting.

Mental Illness and Substance Abuse (MISA)

MISA services provide assessment, cross-system treatment and service planning to people with serious mental illness and co-occurring substance abuse issues.

Outpatient Psychiatric Services

Outpatient Services are available at several locations around the county and includes psychiatric evaluations, medication management, and counseling that is provided in an office or community setting.

Partial Hospitalization

Partial Hospitalization is a day program that includes mental health treatment under the direction of a psychiatrist as well as group therapy and psycho-educational activities.

Program Assistance Team (PAT)

Behavioral management services provided to adults with developmental disabilities to aid in reduction and management of behavioral issues.

Psychiatric Rehabilitation Services

Services are designed to meet the needs of adult consumers who have experienced mental illness and provide an opportunity to explore vocational interests, participate in work-related activities, and receive social and emotional support.

Social Rehabilitation Program (SR)

SR is a day program for adults designed to promote independence by assisting with social, emotional and daily living skills.

Supported Housing

The supported housing program for adult mental health consumers includes in-home supports, assistance in locating housing, rental skill building, budgeting and more.

Supported Living

Supported Living provides supports to consumers in their own homes or rental apartments assisting them as needed to help them develop the skills necessary for independent living.

Vocational

Vocational/Social Rehabilitation Services are designed to assist persons in establishing and achieving their highest level of social and vocational performance and securing meaningful employment.
